Enhance Workflows from Preparation to Administration

Reduce component assembly and risk of hazardous drug exposure

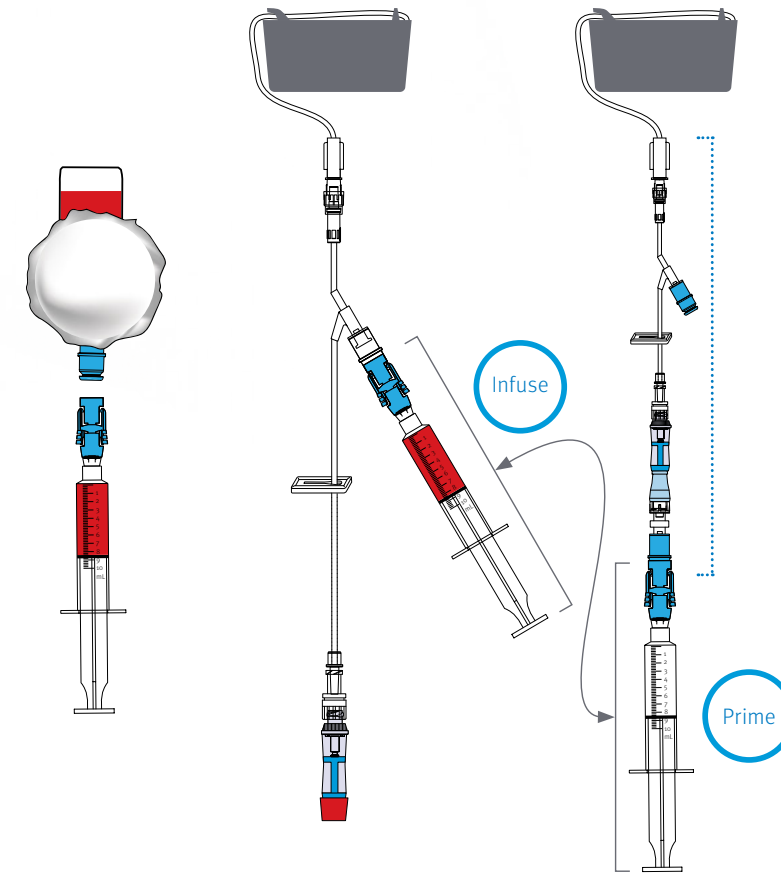

Support safer priming and reduced risk of hazardous drug exposure with convenience kits of ICU Medical closed system transfer device components.

- › Protect against hazardous medication exposure when priming ambulatory extension sets
- › Help prevent drug loss and exposure due to accidental patient disconnect
- › Help maximize workflows and improve setup time
- › Eliminate the need to assemble components

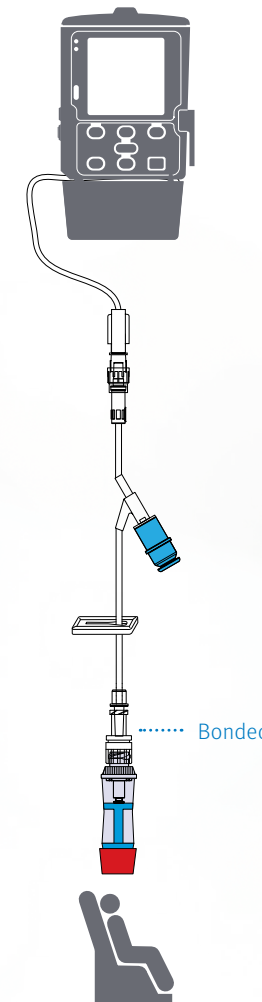

Improve efficiency by automating air removal and drug transfers

Manually removing air from ambulatory pump cassettes can be time-consuming and result in repetitive stress injuries. With the Diana™ Automated Compounding Workflow System, you can easily and automatically remove air and transfer IV oncology drugs while taking the physical stress away from technicians.

Preparation

Safely prepare, prime, and connect with CSTDs.

Administration

Intuitive technology helps enhance patient and clinician safety while bonded components help prevent accidental disconnects and minimize drug exposure.

Choose From a Full Portfolio of Needlefree CSTD Bonded Kits

Get everything you need to prepare ambulatory hazardous drug deliveries, including intuitive needlefree closed system transfer device components and convenience kits.

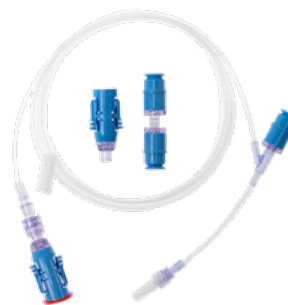

CL3960

Oncology Kit w/60" (152 cm) Smallbore Ext Set w/ ChemoLock™ Port, Clamp, Anti-Siphon Valve, Spiros™ Closed Male Luer; ChemoLock™; Syringe Transfer Set w/MicroClave™, ChemoLock™ Port

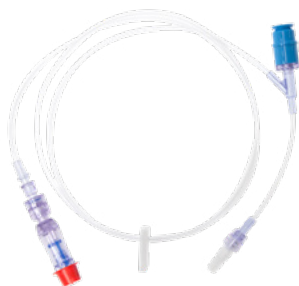

CL4120

Oncology Kit w/61" (155 cm) Smallbore Ext Set, ChemoLock™ w/Red Cap, Anti-Siphon Valve, ChemoLock™ Port, Y-Connector, Clamp, Rotating Luer; Double ChemoLock™ Syringe Transfer Set; ChemoLock™ Adapter

CL4151

45" (114 cm) Smallbore Ext Set w/Spiros™ Closed Male Luer w/ Red Cap, Anti-Siphon Valve, Clamp, Y-Connector w/ChemoLock™ Port, Rotating LuerLock

CH3606

Oncology Kit w/60" (152 cm) Smallbore Ext Set w/Spiros™ Closed Male Luer, Anti-Siphon Valve, ChemoClave™, Clamp, Rotating Luer; Double ChemoClave™ Syringe Transfer Set; Spiros™ w/Red Cap

CL-34

Syringe Transfer Set w/Clave™ Needlefree Connector, ChemoLock™ Port

CL4114

Oncology Kit w/ChemoLock™ Port; ChemoLock™ Adapter; Spinning Spiros™ Closed Male Luer w/Red Cap

To learn more about how we can help you protect clinicians and patients from hazardous drug exposure throughout the ambulatory pump process, call 866.488.6088
